

## ***IAC Acoustics Announces the Release of Noishield® Continuline Sound Barrier***

**Naperville, IL – November 4, 2020**

IAC Acoustics, a leading brand of metal noise control products and solutions serving the industrial, commercial, architectural, and construction industries, is pleased to introduce the Noishield Continuline Sound Barrier.

The Noishield Sound Barrier System is a line of exterior barriers designed with exemplary acoustical components to protect communities from noisy equipment. Every product in the Noishield Sound Barrier line is further designed to be highly durable and weather resistant.

IAC's Continuline maintains the excellence of high-quality noise barrier solutions with a more aesthetically pleasing look to incorporate into any architectural design. Continuline uses the same traditional panels and construction as the standard system, however, it incorporates an endcap that wraps the column, leaving a horizontal reveal providing a contemporary finish.

“IAC Acoustics is excited about the commercialization of this great product,” says Thomas Heins, Director of IAC Acoustics. “Continuline offers the same great features as IAC’s traditional F/S acoustic barrier wall product, with a more aesthetically pleasing presentation, concealing the structural elements of the assembly.”

IAC will be featuring a weekly webinar series throughout November highlighting Continuline. Please visit [www.iacacoustics.com](http://www.iacacoustics.com) to learn more.

### **About IAC Acoustics**

IAC Acoustics offers Acoustic metal solutions for Industrial, Architectural and Medical Applications. The industrial offering includes both in-plant and outdoor enclosures, outdoor noise barriers, anechoic chambers, Dyno Rooms and HVAC products. The architectural products include secure facilities, acoustical doors, windows, music practice rooms and studio packages. The Medical offering includes mini and full-size audiology booths and test chambers.
