

## ***IAC Acoustics Releases INC Dyno Shell™ Ventilation Enclosures***

**Naperville, IL – February 16, 2021**

IAC Acoustics, a leading brand of metal noise control products and solutions serving the industrial, commercial, architectural, and construction industries, is pleased to introduce INC Dyno Shell™ Ventilation Enclosures.

The makers of the INC® Dyno Test Rooms bring a cost-effective option with the INC Dyno Shell Ventilation Enclosures. The INC Dyno Shell is a pre-engineered and manufactured ventilation enclosure for testing on motorcycles, cars and other vehicles. It not only provides a controlled testing environment, but it eliminates fumes to keep a safe and healthy working environment for technicians and employees.

The INC Dyno Shell is easy to install with a modular design allowing for the addition of doors and windows. The Shell panels can also be upgraded or retrofitted with acoustic absorption fill for added acoustical performance.

“The INC Dyno Shell Ventilation Rooms provide our Powersports customer base with an economical choice for Dyno rooms while maintaining a safe working environment for their technicians,” says Ted Marquis, Industrial Sales Manager. “This new product also allows for additional noise control as budgets allow.”

IAC Acoustics will be featuring a weekly webinar series highlighting the INC Dyno Shell in February and March. Please visit [www.iacacoustics.com](http://www.iacacoustics.com) to register and learn more.

### **About IAC Acoustics**

IAC Acoustics offers Acoustic metal solutions for Industrial, Architectural and Medical Applications. The industrial offering includes both in-plant and outdoor enclosures, outdoor noise barriers, anechoic chambers, Dyno Rooms and HVAC products. The architectural products include secure facilities, acoustical doors, windows, music practice rooms and studio packages. The Medical offering includes mini and full-size audiology booths and test chambers.
